

RICKY CHEN

Software Engineer | AI & Full-Stack Developer

Sydney, NSW, Australia | +61 415 185 326 | rickychen930@gmail.com
linkedin.com/in/rickychen930 | github.com/rickychen930 | rickychen930.cloud

PROFESSIONAL SUMMARY

Sydney-based Software Engineer and Master of Artificial Intelligence candidate with production engineering experience at Samsung R&D and current delivery experience across AI applications, full-stack web platforms and IT service solutions. Strong in Python, SQL, JavaScript, TypeScript, React, Node.js, REST APIs and MongoDB. Experienced across requirements analysis, software architecture, implementation, testing, deployment, debugging, documentation and stakeholder collaboration, with a focus on maintainable, secure and user-centred products.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript, Swift, Java, C++

AI & Data: LLM application development, prompt engineering, text summarisation, machine learning, Pandas, NumPy, scikit-learn, TensorFlow/Keras, KNIME

Full-Stack: React, HTML5, CSS3, Node.js, Express.js, REST APIs, MongoDB, data modelling, API validation, responsive UI

Cloud, DevOps & IT: Git, GitHub, CI/CD concepts, deployment support, Linux/Windows fundamentals, Azure fundamentals, server monitoring, Postman

Engineering Practices: SDLC, Agile, OOP, SOLID, DRY, MVC, debugging, testing, code review, accessibility, technical documentation, secure AI-assisted development

PROFESSIONAL EXPERIENCE

Software Engineer / AI Developer | Decode Capital

Sydney, Australia | May 2026 - Present

- Build and maintain AI-enabled applications, including conversational chatbot and text-summarisation workflows, to improve information access and support business processes.
- Deliver features across the full SDLC, covering requirements clarification, solution design, implementation, testing, documentation, release and iterative improvement.
- Apply Python and JavaScript engineering practices, structured prompting, output validation and data-handling controls to improve reliability, security and maintainability.
- Use Git-based workflows, reusable components and technical documentation to support controlled releases, handover and future enhancement.

Software Engineer / Digital Solutions Developer | JB IT Services

Sydney, Australia | July 2025 - Present

- Develop and improve digital solutions for an Australian IT services business, translating service requirements into professional, responsive and conversion-focused user experiences.
- Implement service pages, enquiry pathways, reusable components and technical content with attention to performance, accessibility, local SEO and maintainability.
- Support deployment, configuration, troubleshooting and ongoing technical improvements in collaboration with business stakeholders.

Founder & Full-Stack Engineer | Web Architech

Sydney, Australia | Jan 2025 - Present

- Design and deliver full-stack websites and digital business solutions for Australian service and hospitality clients from discovery through deployment and maintenance.
- Build responsive applications using React, TypeScript, Node.js, Express and MongoDB, including REST APIs, validation logic and reusable UI components.
- Improve local SEO, accessibility, performance, trust signals and enquiry conversion while manually reviewing AI-assisted code for architecture, security and correctness.

Software Engineer | Samsung R&D Institute Indonesia

Jakarta, Indonesia | May 2023 – May 2024

- Developed and maintained SmartThings TV plugin functionality, client-side behaviour and reliable device-to-TV communication for production environments.
- Implemented integration flows, interface improvements and defect fixes while collaborating with QA and engineering teams on code review and release readiness.
- Contributed 300+ commits in 2024 across production features, refinements and bug fixes.
- Achieved Pro Level within the first year, reflecting rapid technical and professional development.

iOS Developer | Apple Developer Academy @ BINUS

Jakarta, Indonesia | Feb 2022 - Dec 2022

- Designed and built iOS applications using Swift, SwiftUI, UIKit, Xcode and Apple Human Interface Guidelines.
- Created Phowto, Regards and Bottani by translating user research and product concepts into tested functional prototypes.
- Worked in Agile teams across ideation, wireframing, development, usability testing, demonstrations and iteration.

SELECTED PROJECTS

JB IT Services Digital Platform | Responsive web development, local SEO, deployment

- Developed a professional digital presence for an Australian IT services provider, improving service clarity, trust, mobile usability and enquiry pathways.
- Applied responsive implementation, structured content and technical optimisation to support discoverability and ongoing maintenance.

Web Architech Business Platform | React, TypeScript, Node.js, Express, MongoDB

- Created a scalable business platform with reusable components, API integration, structured content and conversion-focused user journeys.

EDUCATION

Master of Artificial Intelligence | University of Technology Sydney (UTS)

Sydney, Australia | Jul 2025 - Present | Current GPA: 6.63/7.00

- Focus areas include machine learning, deep learning, AI ethics, data-driven systems, software development and technology research practices.

Bachelor of Computer Science | BINUS University

Jakarta, Indonesia | GPA: 3.83/4.00 | Specialisation: Internet of Things

- Foundation in algorithms, software engineering, databases, object-oriented programming and connected systems.
